

I'd like to have all of this build in HTML5&CSS3.  
I'll upload all the files you need.

## Template Teuno

### Navigation.

At mouse-over, subpage is possible, see the file: Single Teuno @work page.jpg

### Featured image.

2 rounded corners (like every image on the website, upper right and down left - 10px radius). Text can be added via wp-admin

### Content.

### Testimonial.

### Content.

with a read-more button

When a photo is clicked it will open a pop-up as you can see in Homepage - popup.jpg

### Twitter widget.

### Tagcloud

### contact.

The page is centered in the middle and has a maximum width of 960px.
